

Why Do Our Solutions Work?

Let's Read Between the **Red** and **Blue** Lines.

- AHDI starts with a robust foundation of 60 reports called the Healthcare Risk Management (HRM) Reporting System.
- AHDI has added a turbo charger, using EZView™ as a data drill down tool.
- AHDI offers a patented, proven and integrated population health management solution with over 9 years of experience.
- AHDI begins and ends with data—we turn data into intelligence.

Answer Health Questions With Ease

Data queries are quicker and easier with **EZView**, AHDI's trademarked program that creates an online platform for healthcare risk managers to have greater access to health data of covered members.

HOW EASY IS EZView?

- Internet accessible—PCs, notebooks, tablets, etc.
- Tables and graphs explain data
- Single-click export to Excel is user-friendly and intuitive
- Security is iron-clad
- Customized data comparisons analysis
- Power user expertise is not needed

Experience Healthcare Savings On Two Fronts

AHDI has added a turbo charger onto an already robust foundation of reports. We utilize EZView, the newest generation of business intelligence software, as a drill down tool. With the "click" of a button your question is answered and displayed in a variety of graphic layouts.

EZView helps control unnecessary costs by turning data into healthcare intelligence. And, EZView is offered at a great price.
